Skill Level

This product is classified as Basic skill level

Important notes for usage

Triton Activated Carbon should be thoroughly rinsed in RODI water prior to use, fine carbon dust can irritate tank inhabitants especially coral polyps.

How do I use Activated Carbon?

Prior to use the carbon should be rinsed in RODI water to remove fine particles and dust.

100ml of Activated Carbon per 100L of aquarium water, replaced every 4 - 6 weeks.

Carbon can be placed in a bag in an area of high flow or in a reactor, if used in a reactor flow should be slow enough to prevent tumbling of the media.
