

TRITON SUPPLEMENTS Trace Elements

CHROMIUM (Cr)

What is it? What is it for?

Chromium is a Trace element known to be beneficial for calcification of coral skeleton and coral color.

Skill Level

This product is classified as Advanced users only

Important notes for usage

Chromium is an extremely dangerous element if dosed incorrectly into the aquarium.

Only to be used by Advanced users

How do I use Chromium?

Extreme caution should be exercised when dosing Chromium.

Dose 1ml per 1000L and test with ICP-OES regularly, if Chromium appears in ICP-OES analysis stop dosing immediately.

Dose can be increased to a maximum of three times using the same procedure of 1ml per 1000L and regular ICP-OES testing.

Other additional information

Care should be taken not to carry out too many adjustments at the same time because of the risk of elements reacting with one another.

Dose into an area of high flow.

Leave 5 minutes between different element adjustments

Any large swings in element levels can be detrimental to your tank inhabitants.
