Skill Level

This product is classified as Advanced users only

Important notes for usage

Cobalt is an extremely dangerous element if dosed incorrectly into the aquarium. Please ensure that the Aquarium

Only to be used by Advanced users

How do I use Cobalt?

Extreme caution should be exercised when dosing Cobalt.

Dose 1ml per 1000L and test with ICP-OES regularly, if Cobalt appears in ICP-OES analysis stop dosing immediately.

Dose can be increased to a maximum of three times using the same procedure of 1ml per 1000L and regular ICP-OES testing.

Other additional information

Care should be taken not to carry out too many adjustments at the same time because of the risk of elements reacting with one another.

Dose into an area of high flow.

Leave 5 minutes between different element adjustments

Any large swings in element levels can be detrimental to your tank inhabitants.
