

TRITON TREATMENTS DI Resin

What is it? What is it for?

TRITON DI Resin is an ultra pure de-ionising designed for use with Reverse Osmosis water production to give Ultra Pure 000TDS RODI water.

Lab tested at Triton Labs to ensure it's purity and be free from contaminants.

Skill Level

This product is classified as Basic skill level

Important notes for usage

■ Do NOT rinse DI resin prior to use.

How do I use DI Resin?

TRITON DI resin should be used in a suitable DI pod/container and used in conjunction with a Reverse Osmosis unit.

We recommend the use of 2 DI pods to ensure that all contaminants are removed. Both DI pods should be inline after the final stage of RO production, we recommend the use of an in-line TDS meter, with In/Out sensors being either side of the first DI pod. Once the TDS meter registers 001 TDS on the In sensor then both pods should be replaced.
