

TRITON TREATMENTS Detox

What is it? What is it for?

Triton Detox is a solution used to remove excess unwanted heavy metals from seawater.

Skill Level

This product is classified as Basic skill level

Important notes for usage

Detox should only be used as a result of Triton ICP-OES analysis showing excess of Copper or Lead

How do I use Detox?

Remove activated carbon
Dosage of 3ml per 100L system volume into an area of good flow
Leave skimmer running at all times
After 3 days replace activated carbon
After 1 week replace activated carbon

During the dosage you will find that your tank water will go a dark brown colour, this is perfectly normal and will pass in a number of hours. You will also see increased skimming so monitor and reduce if necessary to prevent it overflowing.
