

TRITON SUPPLEMENTS Macro Elements

SULPHATE (S)

What is it? What is it for?

Sulphate is a Macro element shown to be beneficial for calcification of coral skeleton matrix and health of LPS /SPS corals

Skill Level

This product is classified as Intermediate Skill Level

Important notes for usage

Sulphate if dosed incorrectly can be dangerous to your system inhabitants, please ensure that your Aquarium Profile volume is filled out correctly and do not exceed the dosage instructions provided from your ICP-OES analysis.

How do I use Sulphate?

The supplements should be dosed as per recommendations from your ICP-OES test results.

You will be advised of either a correction dose (to bring value up to set point) and/or a maintenance dose (to keep it at the set point).

The test results will also guide you to the maximum safe dose per day for your system.

Other additional information

Care should be taken not to carry out too many adjustments at the same time because of the risk of elements reacting with one another.

Dose into an area of high flow.

Leave 5 minutes between different element adjustments

Any large swings in element levels can be detrimental to your tank inhabitants.
